### TO WHOM IT MAY CONCERN

It is my pleasure to recommend Faria Islam in the purpose of getting admission at your university for Master's Program. She was personally known to me as an undergraduate student of Genetic Engineering and Biotechnology at East West University since 2016. During her study at the East West University, she took several courses of mine in different semesters and achieved good grades. These results show how much she was passionate about her studies.

Ms. Islam's technical skills in both dry and wet labs were satisfactory. Besides her studentship, she was well mannered, punctual, ambitious with a pleasant and leading personality. She proved herself both in curricular and extracurricular activities along with her outstanding communication skill.

I am highly impressed for her penchant for higher studies abroad and firmly believe that she has enormous potentials to be an outstanding student at your university. I strongly recommend Faria Islam for admission in your program. I hope, she would be able to demonstrate her intellectual strengths to successfully complete the program and fulfill your expectations. Please do not hesitate to contact me if you need any further information regarding her academic matter.

Sincerely

**Mohiuddin Kabir, Ph.D.**

Associate Professor

Dept. of Genetic Engineering & Biotechnology

East West University, Dhaka, Bangladesh
